ARIES

ARIES: Delegated Authority Simplified

ARIES is as a single platform where all stakeholders in the delegated authority value chain can register, manage engagements, and collaborate throughout the lifecycle of binder contracts. It not only meets stringent governance and compliance demands but also eliminates inefficiency by centralising critical processes.

ARIES provides private digital spaces for contracting, relationship management, and comprehensive performance tracking against established metrics and standards.

Key Features

Comprehensive Contract Management:
Streamlines the creation, approval, and assignment of contracts, fully digital from inception to completion.

Audit and Compliance Tools:
Ensures rigorous compliance and facilitates audits with customisable tools that adapt to specific needs.

Performance Service Metrics:
Monitors performance through detailed service level agreements, key performance indicators, and real-time auditing and scoring.

Benefits

Single Source of Truth: Consolidates data and management information on a unified platform, enhancing visibility and control.

Enhanced Due Diligence: Automates and streamlines the due diligence process, improving accuracy and reliability with less manual effort.

Improved Contract Efficiency: Accelerates contract handling, reduces errors, and supports dynamic adjustments to agreements.
